

STRATEGIC PARTNERSHIP PROPOSAL · CONFIDENTIAL

AI-Enabled Modernization of Mystery Shopping Operations

A phased strategic roadmap to engineer a next-generation, AI-powered platform for HS Brands Asia — from intelligent mobile data capture to automated quality assurance.

PREPARED FOR
HS Brands Asia

PREPARED BY
YOM Solutions

DATE
March 14, 2026

TOTAL INVESTMENT
\$120,000 USD

Contents

01	Executive Summary & Strategic Context	2
02	Solution Architecture	3
03	Delivery Plan & Timeline	4–5
04	Commercial Investment	5–6
05	Assumptions & Exclusions	6

- HS Brands does **not have an existing shopper app** — built from ground up
- Admin: **web-first** · Shopper: **mobile-first**
- Initial rollout: **English-first**
- Multilingual support in later phases
- Final scope may vary per hosting/data requirements

SECTION 01

Executive Summary

HS Brands Asia has a unique opportunity to fundamentally modernize its mystery shopping operations. By transitioning from manual, fragmented data collection to an AI-enabled, mobile-first platform, HS Brands can drastically accelerate turnaround times, enhance data accuracy, and seamlessly scale operations.

Rationale: Empower clients with experience reports based on single or all configured shoppers per store (with hour-based tracking), target small business owners through dedicated client app access, and deliver seamless internationalization for clients, shoppers, and service providers.

6-phase delivery · ~8 months · \$120,000 USD fixed. Four pillars: shopper submission, automated QC, cloud AI infrastructure, client onboarding. *Final timelines committed after Discovery.*

Target Objectives

- Submission accuracy & turnaround speed
- Quality control efficiency & scalability
- Client-facing reporting readiness
- **Client onboarding** improvements
- **Multi-tenant / Globalization** support

Key Pain Points

- **Inconsistent Data:** Manual entry → incomplete submissions
- **Delayed QC:** Invalid images caught too late in pipeline
- **Reporting Bottlenecks:** Manual validation delays insights
- **No Existing App:** No dedicated platform limits efficiency
- **Limited Intelligence:** No AI for voice, images, or unstructured data

SECTION 02

Strategic Context

1. **Setup** — Surveys, shopper guidelines
2. **Fieldwork** — Assignment, task completion
3. **QC** — Validation, image review, clarifications
4. **Reporting** — Dashboarding, insights

Proposed Solution Architecture

YOM Solutions will engineer a proprietary platform structured around four core pillars:

01

The Shopper Application

Mobile-first app to eliminate friction in the field.

- **Location-Aware Tasking** — Geo-fenced suggestions
- **Voice-to-Text** — AI-powered post-visit surveys
- **Smart Submission** — Real-time validation before submit
- **Media Checks** — On-the-fly image verification
- **Geo-Verification** — Location-linked task confirmation

02

HS Features — QC, Validation

Supercharge the QA team and streamline management.

- **AI-Assisted QC** — Auto-flag suspicious submissions
- **Smart Queues** — Priority by urgency & risk
- **Command Center** — Real-time pipeline visibility
- **Report-Ready** — Faster client-readiness checks

03

Cloud AI Foundation

Secure, scalable backend powering the ecosystem.

- **Data Lake** — Secure media & data storage
- **Unified APIs** — Mobile, admin, AI modules
- **Enterprise Security** — RBAC, audit trails
- **AI Pipeline** — Voice, image, routing services

04

Client & Admin Portal

Faster access to validated submissions & onboarding.

- **Client Onboarding** — Tenant management
- **Dashboarding** — Configurable reports
- **Storefront Mgmt** — Location controls
- **Report Readiness** — Faster client handoff

Delivery Plan & Timeline

Phased implementation delivering measurable value early while minimizing risk.

Phase 1 — Discovery & Technical Blueprint

Understand current operations, validate assumptions, define blueprint.

- Stakeholder calls · Document As-Is flows · Define AI integration approach · Review privacy & governance

Deliverables: Discovery summary, As-Is flows, technical blueprint · **2 weeks**

Phase 2 — Shopper App & Submission Modernization

Build mobile app and modernize how shoppers complete and submit visits.

- Cross-platform app dev · Voice-based surveys with AI transcription · Guided UX · Image upload · Geo-linked tasks · Submission-time validation

Deliverables: Shopper mobile app, voice-enabled survey, smart submission · **13 weeks**

Phase 3 — HS Process Improvements

Build admin/validator dashboard with AI-assisted quality control.

- Image validation · Auto-flagging · Review queue improvements · Validation status · Report-readiness workflow

Deliverables: Admin dashboard, partial QC automation · **8 weeks**

Phase 4 — Client Onboarding & Admin Solutions

Empower clients with dedicated access, configuration, and insights.

- Client onboarding & tenant provisioning · Web+App client support · Configurable reports · Storefront mgmt · Custom questions

Deliverables: Client portal, configurable reporting, onboarding flow · **5 weeks**

Phase 5 — Platform, Cloud & Intelligence

Strengthen backend scalability, add operational intelligence.

- Backend APIs · Cloud storage · Role/access mgmt · Logging/audit · Location-based tasks · i18n groundwork

Deliverables: Scalable backend, task suggestions, AI pipeline · **4 weeks**

Phase 6 — Testing, Pilot & Stabilization

Validate workflows in controlled rollout, refine with real usage.

- QA and UAT · Pilot rollout · Bug fixing & hardening · Feedback-driven iteration

Deliverables: Pilot-ready release, stabilized production · **3 weeks**

Total: ~35 weeks (~8 months). Sequential phases with possible overlap to accelerate.

Phase Delivery Timeline

Visual representation of phase sequencing across the 35-week engagement.

Weeks 1–35. Darker bars represent earlier, higher-investment phases. Lighter bars represent later phases.

SECTION 05

Commercial Investment

PHASE	FOCUS	COST (USD)
P1	Discovery & Blueprint	\$6,500
P2	Shopper App & Backend	\$46,000
P3	HS Process Improvements	\$26,000
P4	Client Onboarding	\$17,000
P5	Platform & Intelligence	\$14,000
P6	Pilot & Stabilization	\$10,500
Total		\$120,000

Budget Allocation by Phase

Payment Milestone Schedule

Billing is tied to delivered value. Invoices due within 15 business days of milestone approval.

	M1 Kickoff & Contract \$18,000	M2 Phase 1 Blueprint \$18,000	M3 Phase 2 App Beta \$30,000	M4 Phase 3 QC Done \$24,000	M5 Phase 5 Platform \$18,000	M6 Pilot & Go-Live \$12,000
	TRIGGER				%	AMOUNT
M1	Project Kickoff & Contract Execution				15%	\$18,000
M2	Delivery of Phase 1 Discovery Blueprint				15%	\$18,000
M3	Delivery of Phase 2 Shopper App Beta				25%	\$30,000
M4	Delivery of Phase 3 Process Improvements				20%	\$24,000
M5	Delivery of Phase 5 Platform Integration				15%	\$18,000
M6	Successful Pilot & Go-Live				10%	\$12,000
	Total				100%	\$120,000

Cost vs. Timeline Matrix

PHASE	WEEKS	COST	\$/WEEK	% OF BUDGET	% OF TIME
P1 Discovery	2	\$6,500	\$3,250	5.4%	5.7%
P2 Shopper App	13	\$46,000	\$3,538	38.3%	37.1%
P3 HS Process	8	\$26,000	\$3,250	21.7%	22.9%
P4 Client	5	\$17,000	\$3,400	14.2%	14.3%
P5 Platform	4	\$14,000	\$3,500	11.7%	11.4%
P6 Pilot	3	\$10,500	\$3,500	8.8%	8.6%
Total	35	\$120,000	\$3,429	100%	100%

SECTION 06

Key Assumptions & Exclusions

Assumptions & Dependencies

- **Access:** HS Brands provides docs, APIs, and stakeholder availability during Discovery
- **Review:** Sign-off within 5 business days per deliverable
- **Content:** All copy, surveys, guidelines supplied by HS Brands
- **Environment:** Dev/staging provisioned collaboratively

Out of Scope

- Cloud hosting costs (AWS, Azure, GCP)
- Third-party API fees (OpenAI, maps, SMS)
- App Store developer account fees
- Post-launch managed services & SLA
- Multi-language translation beyond English

Next Steps

1. Review and approve this proposal
2. YOM Solutions issues MSA and M1 invoice
3. Phase 1 kickoff within 5 business days of execution

We believe the strongest initial value lies in building
the **shopper mobile app**, combined with **submission-
time validation** and **QC automation**.
